Making Healthcare More Meaningful™

PROFITING

MEANINGFUL RESULTS THAT ARE GUARANTEED EVERY TIME…BY FOCUSING ON YOUR BOTTOM LINE

With Alldata Clinix, medical professionals can generate bigger profits while instantly eliminating billing hassles by charting electronically, scrubbing claims via a hi-tech monitoring system and ensuring coding accuracy through a comprehensive review of every outgoing claim.

Users of All Data Health's exclusive EHR software, Alldata Clinix, will benefit from an EHR system that places a particularly strong emphasis on the billing process.

By combining the hi-tech benefits of Alldata Clinix's EHR & Practice Management system with the unparalleled medical billing expertise offered by All Data Health, medical professionals now have the unprecedented ability to better manage their practice, enhance patient care and generate higher billing revenues – one patient at a time.

THE EXCLUSIVE ALL DATA HEALTH
EHR SOFTWARE POWERED BY OMNIMD

ADAPTING

YOU ARE TAKING A BIG LEAP FORWARD IN THE WORLD OF HEALTHCARE…AND WE'RE RIGHT AT YOUR SIDE

Physicians are now facing new rules and regulations requiring them to implement EHR technology – known officially as an Electronic Health Record system – within their medical practices.

Alldata Clinix is an ONC-ATCB & CCHIT certified EHR & Practice Management software system powered by OmniMD Version 11.0 that helps medical practices of all sizes and specialties abide by Federal regulations, streamline office operations and receive up to $44,000 from Medicare or $63,750 from Medicaid in incentive payments.

Boasting a CCHIT 5-Star usability rating for ease-of-use, 2011-2012 ONC-ATCB certification supporting meaningful use, SureScript and Microsoft Gold Partnerships and customizable features for over 30 different medical specialties, Alldata Clinix is the one-step EHR & Practice Management solution that medical professionals can rely on to take their practice to the next level.

STREAMLINING

ORGANIZING YOUR ENTIRE PRACTICE WITH THE PUSH OF A BUTTON – WE'LL MAKE IT CLICK

With the advantages offered through Alldata Clinix's EHR & Practice Management software, physicians have numerous options to enhance record keeping and appointment scheduling procedures, reduce medical errors and malpractice lawsuits, and improve overall quality of care.

Alldata Clinix virtually eliminates the hassles posed by filing paper records, provides physicians with instant access to patient information regardless of time or location and increases patient flow through automatic patient reminders and health alert notifications.

Best of all, The HITECH (Health Information Technology for Economic and Clinical Health) Act provides financial incentives to healthcare professionals that implement an EHR system like Alldata Clinix into their practice and will pay for the entire cost of obtaining and setting up the system – with significant funds left over for the physician to keep as profit.

SIMPLIFYING

WORLD-CLASS EHR & PRACTICE MANAGEMENT SOFTWARE THAT MAKES YOUR COMPLEXITIES SIMPLE

Alldata Clinix's award-winning features include:

- A web-based system that does not require any installation of servers or sophisticated computer technology – healthcare professionals can have instant access to Alldata Clinix through a standard internet connection.
- A specialty EHR system documenting patient history, vitals, physical exams, HPI, ROS, allergies, medications, assessment and plan data that's compatible with other third-party programs including lab order systems, hospital and pharmacy interfaces, and mobile integration capabilities for SmartPhones and iPads.
- Customizable appointment scheduler, referral requests, document management, scanning and indexing capabilities, health maintenance alerts, patient reminder services, transcription services, insurance eligibility verification, customized creation of your favorite superbill with up-to-date ICD codes, CPT codes and modifiers, and E-prescribing with real-time alerts for drug-drug, drug-allergy and other interactions.

BENEFITING

MAKE THE MOST OF YOUR NEW SYSTEM…BY GETTING MORE

Alldata Clinix is the exclusive EHR software of All Data Health, New York's leading medical billing company, and designed specifically to resolve crucial issues that can affect the billing revenue of medical practices.

- Doctors will often lose money billing via their EHR system because it doesn't always alert the physician to utilize the best insurance codes for reimbursement. Alldata Clinix, however, features a detailed rules engine and robust claims scrubber to assure clean claims submission and prompt payments.
- Standard EHR systems won't look out or follow-up with denied claims or underpayments – Alldata Clinix aggressively follows up on all claims and facilitates receipt of payment from the insurance company within an amazingly short timetable.
- There are many LCDs (Local Coverage Determination) that are carrier specific – most EHR systems do not alert about carrier specific diagnoses and procedures, resulting in physicians losing out on payments by using non-payable or erroneous codes. Alldata Clinix generates the proper codes for every billable procedure by internal scrupulous review on every claim before submission.
